You... tried... to do this...  
Behind my... fucking back  
There's... no... turning back now  
We will meet... on... this battleground  
Here... we... stand... face... to face  
This... moment will decide  
The outcome of your life  
Only... god can judge you now  
The pleasure of your blood soaked on my fist  
Makes me pound your face in even more  
And then... you will see... the power... I have  
End this battle you've started  
And now you lie... here alone  
Beaten to your grave  
You... stand aside  
A coward to these battle lines  
And now you lie... here alone  
Beaten to your grave  
And then... you will see... the power... I have  
End this battle you've started
