

Death Do Us Part "Legend"

Visit "[Legend](#)" on MotoLyrics.com

What... comes... next
One man has lived through this
His end is at hand
Each day he waits for his days to come to an end
They wait for a false move to attack
The plague has come at last
Now all life is at past
Now doom waits for one man
Who does all that he can to survive
Now it's time to fight back when day shines
Now is the time to fight back
No matter... how much
They bring me... down the
Fight will end... when things
Are set straight
The urge to strip away his life
Has passed through his mind
The fight to live has overcome his soul
No will to live makes him fight harder
The thought of death means nothing anymore
One... on... the... world...
What comes... next
