We're just puppets left to parch  
Dancing to a deadly march  
The evil circus can't be stopped  
If the lamb of God gets dropped  
The ragin' fury gives the clown power  
Leads the game to a bloody shower  
Flowing down our despair  
We evoked the beast from his dark lair

It's the circus of death

Hate turn us into gnawing vultures  
With killer faith and imposed culture  
Jugglers, dwarfs and mountebanks  
Confuses us all with all their pranks  
When the circus come to town  
All'o our certainties fall down  
When the lions will get to roar  
We'll prepare ourself to war

Fools have many tales to tell  
While they lead the way to hell  
Jesters have no laws or moral  
When they start their bloody quarrel

It's circus of death
