Now I'm back again  
On this track again  
Finally made it  
Pushed to the limits  
Can't live within it  
Can't do without it  
Where's the surprise?  
Sharp edges cut at me, they make me bleed  
I've never been so happy,  
Never felt so free  
And strangers push me, force me to be hard  
These nights I'm lonely,  
Lucky I'm so scarred.  
She's got me, so I don't need you  
You want me, You just don't know you do  
I try to love you while you're spitting in my face  
I put you on a pedastal - You put me in my place  
We pay to be told  
What our tiny futures hold  
Yours looks bright  
And mine is black  
I want my money back  
You're religious,  
Screaming for your saviour  
I'm asthmatic  
Clutching my inhaler  
This city air is  
Killing me  
Now I'm become  
Just what I was meant to be  
Well it might seem hard now  
But I'll hold on to the end  
And we're not really enemies  
Coz I'm your only friend  
And you and me together  
We'll kill the night away  
We'll kill the night away  
Kill them all away  
Why's it so hard to remember  
All the good times we had  
..And why's it so much easier

To feel so fucking bad  
I know I had some dreams then  
But all of them fell through  
I wanted to have everything  
I can't even have you  
Well I'm so fucking faceless  
You might as well erase us  
I'll take all you can give me  
Don't need you to forgive me  
I'll kill your fucking jesus  
I'm not some fucking rhesus  
I only want to fuck you  
To out-evolved your weakness

You're religious,  
Screaming for your saviour  
I'm asthmatic  
Clutching my inhaler  
This city air is  
Killing me  
Now I'm become  
Just what I was meant to be  
Well it might seem hard now  
But I'll hold on to the end  
And we're not really enemies  
Coz I'm your only friend  
And you and me together  
We'll kill the night away  
We'll kill the night away  
Kill them all away
