"black death is the price, when this carrier arrives  
He's possessing deadly sickness, the plague of  
leprosy"  
And so the sermon ended, our wicker man had spoke  
Those words held a wisdom, the plague would soon be  
here

A black rider appeared from the east  
And look, he had no eyes

Disease was now upon us, it forced through our veins  
"I sentence you to burn, take your plague to the grave"  
The priest condemned us all, into the everlasting fire  
But what he didn't know, he had become a carrier...  
Of pestilence

"my god abandoned me, my prayers were unheard"  
The priest cried... he was a carrier of pestilence

Carrier of pestilence

"chronic infectious disease  
Caused by mycobacterium leprae"

Horseman laughed and smiled, his evil deed was done  
Creation of the underworld, this creature truly was  
And everywhere he went, death gave him company  
And be sceptic minded, the pestilence will rise again

"my god abandoned me, my prayers were unheard"  
The priest cried... he was a carrier of pestilence

Carrier of pestilence
