Tools of mass destruction gathered for genocide  
Signs of final chaos fires shall fill the sky

It's fucking war

Countdown to extinction, slaughter the lambs of war  
First strike is still deadly, deadliest of them all  
Massive killing machines, unleash the dogs of war  
Madness of the leaders, nuclear holocaust

Rebirth of terror... through deadly religions

Chaos wartech... death falls from the sky  
Deadly warheads... nuclear warfare  
Molten lava burns the earth  
Melting bones in fiery fallout

[Solo: satkis]  
Immolated corpses laying in the ruins  
There is no escape and nowhere you're safe  
Acid rain, mushroom clouds  
Countless deaths, insane bodycount

Destruction of nations... by earthly damnations

Massive killing machines, unleash the dogs of war  
Madness of the leaders, nuclear holocaust  
Ruins are all that remain, of the kingdom lost  
Enter worlds beyond, leave this world behind

Chaos wartech... death falls from the sky  
Deadly warheads... nuclear warfare  
Molten lava burns the earth  
Melting bones in fiery fallout

Immolated corpses laying in the ruins  
There is no escape and nowhere you're safe  
Acid rain, mushroom clouds  
Countless deaths, insane bodycount
