An old friend had visit us again
An old friend who's always coming back
We saw your face in dust over Berlin
We saw your face when in napalm over Nam
You show no color you show no race
But you always show your face
The face of you have been seen
Day of 9 eleven on the screen
We saw your face in blitz over London
We saw your face when you melted Japan
You show no color you show no race
But you always show your face
