Silence is broken someone Is calling our name  
In the corner of your eye A glimt is all you see  
Whatever it is, What the fuck is this It is close now  
What we're doing tonight  
What we're doing tonight  
Echoes in eternity

With full force - We're coming down on you  
With full force - We command you

Sorrow is broken you are Chanting our name  
The paleriders coming We'll follow  
What ever we do Where the fuck we go  
You will follow  
What we're doing tonight  
What we're doing tonight  
Echoes in eternity

With full force - We're coming down on you  
With full force - We command you
