We are the spirits of war and fire
Ultimate slaughter is our only desire
We are here to bring the pain
We are demons, we are crazy and bloodstained
We live to kill, we live for murder
We are unbreakable, we follow a code of honour

We are armed with axes, marching through storms of death
Out of the twilight world, bringing the final breath
We bring the fucking final breath

First through the breach
First among carnage
That's the end of the siege
Feel my rage
Blood upon virgin earth
Blasphemy and death
Smell the blood I let
Hear my blades

Decapitate, annihilate, butchering
To the battle like cattle to the slaughtering

Let the butchery commence
Live for the violence

There is only war

Massive artillery pieces roar
A whole machinery dedicated to war
Thunder and lightning
Aircraft striking
The barrage stops
There is no escape
The signal is screaming
To kill and rape

Decapitate, annihilate, butchering
To the battle like cattle to the slaughtering

Let the butchery commence
Live for the violence

There is only war

War
Total fuckin' war

That's the end motherfucker
A brutal death
I kill all you suckers
With metal through flesh

There is only war
