Awakened from the dream  
Face to face with my livid memories  
Breaching the fabric of the creation  
I see the age less form before me  
A reflection of myself  
I see my eyes and in them

Worlds  
Universe/multi-verse  
The orb of light  
Where the three points collide  
Worlds upon worlds multiply  
(within/outside) themselves  
The point from which dimensions flow  
Unity achieved through alchemy  
Countless images of myself  
Staring back (into/from in) my soul

Mind and soul merge  
Evolve my conscious  
Unity unparalleled through time  
Through out all of the worlds I remain the chosen  
I am the concept of god...creation  
The light of deception is the nexus of time  
The nexus of my creation  
Eternal illusion  
The gateway to the paradox...infinity  
Evolved through imagination  
I emerge  
I emerge in my true form  
Consciousness without self  
Invoking life within  
The portal of my dreams  
I see the cycle  
(I see/I am) the spectrum  
(I see/I am) the circle unending  
I am the light  
The nexus  
I am the though beyond (infinity/eternity)
