"Move With Me Slowly"

Visit "[Move With Me Slowly](#)" on MotoLyrics.com

I'm lost in imagination I just groove on your breathing I
do it all for you Still contemplate animation You've got
a problem witcha boyfriend He don't squeeze you right
Keep you waiting all night He got you facedown and
waiting, baby So do me a favour Won't you Move with
me slowly Get too close to me Move with me slowly Just
like we're meant to be Just like we're meant to be Hey
say sister You're dreaming Is gonna cut A little
conscious behavior You got stars in your eyes You
down to size You hear me knocking So let me in And
your love wears thin When your blood runs cold It's
under the skin It's over passion If love ain't a miracle It
sure ain't a sin So let me in Take me to the city Take me
anyway Take me on my knees You find me baby I've
got this love disease And there ain't nothin' I can do
