"We've Got Same Feelings To Do"

Visit "[We've Got Same Feelings To Do](#)" on MotoLyrics.com

Last night our conversation led to what we're thinkin'
But we never let it go that far
But tonight let's admit it it's too late to forget it
We started the flame and we're both on fire

And darling the way day is through
I see the want-to all over you
We don't need the talk about it we've already told
about it
But we've got some feelings to do
[fiddle - steel]
Now the candle's slowly dyin' and you're softly sighin'
I've never touched a woman like you
I feel your warmth beside me so let your sweet love
guide me
Cause we've got some feelings to do

And darling the way day is through...
