If you dare  
Look up and see what's there  
Level your eyes with some surprise  
At the truths realized

Now you care  
And you will climb for air  
With some relief you've found your peace  
Are you taking us there

Some cold comfort is waiting somewhere

Stand out  
Now we can see we've been found out  
How can this be  
We've been hoping and praying  
There's one life worth saving

Cold out

Happy to be here  
Without doubt  
Too much to see here  
I'm hoping and praying  
There's one life worth saving  
It's not too late

Trust in us  
If you can trust in us  
Follow the lead for hearts that bleed  
We're a difficult breed

Once you're found  
No longer gagged and bound  
Whisper to me  
I think I'm free  
And the world will turn round

In between us  
There are colours  
But they're hidden from view  
In between us

There is silence  
But it's breaking for you

Some cold comfort will tell us what's true

Stand out  
Now we can see we've been found out  
How can this be  
We've been hoping and praying  
There's one life worth saving

Cold out  
Happy to be here  
Without doubt  
Too much to see here  
We're hoping and praying  
There's one life worth saving

Hold out  
My own reflection  
I've found out  
Less than perfection  
I'm hoping and praying  
There's one life worth saving

Cold out  
Happy to be here  
Without doubt  
Too much to see here  
I'm hoping and praying  
There's one life worth saving
