Well you know I have not a day to loose
If I think to stay and try to change the world
If I?m feeling down I just have to wait
The time when you come could make everything
change
You know you?re the reason why I feel so fine
?Cause you?re my beautiful thing

Buildings that have made just to be destroyed
Roses have grown to dead on the flower base
As I feel the end of some little things
I can feel the time bringing more happiness

Estribillo

Goodbye to the things that I left behind
Welcome to the world younger now than before
If I?m feeling down I just have to wait
The time when you come could make everything
change

Let?s change the world
You close to me
You?ve changed my mind
That?s reality
Let?s change the world
Let?s move our feet
Let?s find the love for the eternity

Estribillo
