[Lupe Fiasco:]

Alarm clock said i'm too late  
And they said i'm too weak I could use a few weights  
So they said I took too long and don't look too strong  
Well how long would you take?  
Waiting's got me here in the first place  
Another second, i've been second maybe third in the  
worst case  
Now it's displayed in my wordplays  
Moving weight, it's such a trap  
Move and wait, you can't do that

I know i'm dope man but I can't move crack  
And it's such a fracture when you're thinking 'bout your  
plans

But I try and bring it back before your brain hit the pan  
Sean from Detroit, Lupe from Chicago land  
But both of our chains say made in Japan  
German engineers designed both of the Sedans  
Ride with Mr. right on time, or stay Miss. another  
chance  
Now, redirected at the girls, not an ultimatum just an  
option in this world  
When things come and go, when the clocks never stop  
Be on time for nothing, a little late for a lot
