Every girl to you is wish I forget this  
Now make it please stop  
... it's natural to the plastic dialog  
Set the things... I f I never see the... low  
The life can take... is a deal...  
Before... ain't no poverty... is for real... better world  
... one more... watch and deserve, she wanna love she  
wanna...

Hear me your man one fur the... for inside  
... for my style send all the money... never grew up...  
When I was a little child so now you see... I feel for  
you...  
Told them if you will... is a better way  
My plane you heard just... for the road...
