[Verse 1:]

Monday morning is when things all go bad
Friday night were the good times are had
You put on your secret party girl act
You have a secret party time pact

[Bridge:]

You go down when the music goes up
You go to the bar put vodka in the cup
You bitch and moan about the wait
It gets bad when your boyfriend is late

You scream at the mirror cause you feel all gross
It's your boobs that they should see the most
Cause when they see your chest they will start to stare
There brains float in mid air

[Chorus:]

It's just the noise of music that makes you go insane
It's just the boom of the beat that makes you lose your
brain
You go mental over the sound
It's just that noise, it's just that noise
You flip your hair, you let it all out
You don't drink water cause were in a drought
The bass is going through the floor it leaves you wantin
more
Of that bass, of that sound, of the boom all around.
It's the beat and the heat it leaves you needing more.

[Verse 2:]

You see that boy you think he is pretty cute
You're guy is late so you're ready to shoot
He has blonde hair, he has green eyes
You cannot belive you are living a lie

[Bridge:]

[Verse 3:]

Dancing around isn't all it could be
Jumping around leaves you unable to see
I try and find the inner me
And start to breathe
