Blindness is in my mind  
Powerful words are turning around reality  
In my head chances come from a back  
Santify love found it's way  
I still burn in your flames  
Another day  
They sun didn't rise again  
Next time avoided my infinity cry  
Suicide opened it's destructive wings  
Still dancing in your flames  
I whisper calmly something again  
My hurt lips, don't let me talk louder  
Despite sucking blood from them  
Sticking atoms together  
I take away anger with a mechanical move  
I ask why and what for?  
Identifying a night with emptiness  
I create changeable system:  
A darkness
