"From The Outside"

Visit "[From The Outside](#)" on MotoLyrics.com

Another hand has turned
Across the face of time
Reaching out somewhere beyond
We're on the outside
Looking back at you
There's so much more to black and white
No more heroes they're left behind
Silent running
Turned full circle a high in the sky
Watching waiting
It's up to you to see it through
It's up to you to see it through
And if you're new, you'll see it through
And if you're new, you'll see it through
Free the memories, images are formed
Lightning switch across the lens
The line of forces travels in material waves
The spirit the crowded sometimes sense
One dimension, real world and the stage
Communication
Take advances as though men were more
Changing tempo
It's up to you to see it through
It's up to you to see it through
And if you're new, you'll see it through
And if you're new, you'll see it through
Together now we know we are
Togethet we are
Together what we speak we see
Together we see
