The wars that they wage
With violent murderous rage
The hungry soldiers of fortune
Care not who they oppose
Relentless assault
Of assassins for hire
Destroying at will
All that stand in their way
Specialists in destruction
Is their life's only function
Mercenary onslaught will be
Brought down on you
Mercenary aggression
Devastation obsession
Countless victims cry out
Against their brutal oppression
Forced into bondage
Their captors show them no mercy
They fear the wrath of mercenary aggression
Ruthless brigade
Dealing tactics of pain
Planning their strategies
Of bludgeon at strife
With a government issued
Contract of death
They attempt to besiege
A tyrant deranged
Insurmountable impact
Gladiatorial combat
Politicians terrorist
Soon fall their prey
Mercenary aggression
Infiltration prevention
Ammunition repels
Military contention
Disarming a strong hold
With chaotic precision
Overthrow a regime with
Mercenary aggression
[Lead Sykes]
6. Hydrophobia

Outcast wretched mongrel hound
Roaming canine madness
Incisors ripping painful force
Viciously clamps down
Rabid vector, fit of violence
Unprovoked assault
Bloodstained lethal quadruped
Poised for attack
Viral laden infected saliva
Contaminates your wounds
Plundering your neural tract
Genetic genocide
Bearing a trifling insignificant
Mad dog puncture wound
You realize not the tortured Hell
You're about to be put through

Broken skin
Rabid jaws, contaminate, rabies
Viral plague
Infiltrates, spinal cord
Foaming mouth
Boiling spit, fevers rage, rabies
Destructive
Mania, compulsive, rabid death

[Leads Reilly, Sykes]

Rescinding incubation
Plague ascends to the brain
Torrid fever seething, furnace in your head
Frothy secretions spill and dribble
From your gasping mouth
Voice distorted, phonetics like a human dog
Hydrophobic spasms, deny your greed for water
Your face depicts a mask of terror
Drooling uncontrolled
Interment mental derangement
Exploding from restraints
Bicuspid flailing brute creation
Veracious rabid feast

[Repeat 2nd verse]

Your last mortal hours spent
Bound to a post
