"Deteriorate"

Visit "[Deteriorate](#)" on MotoLyrics.com

Time has had it's way with me
My broken, tired hands can't build a thing
The wires that have held me still
Embedded now in flesh, define my will
The idle of my days has won
The empty I have fed has made me numb
Despite what you will find in me
The failures of my past still swell beneath

(Prechorus)

I need a heart that carries on through the pain
When the walls start collapsing again
Give me a soul that never ceases to follow
Despite the infection within

(chorus)

Our careless feet leaving trails
Never minding the fragile dirt we all end in(x2)

This is where i find my fall
The cares that held me life don't work at all
And every step away from here
Is closer to the plague I hold so dear

(Prechorus)

(Chorus)

Awaiting my end
Breathing in the day that finds me new
Redemption begins
Bleeding out the flaws in place of you(x2)

(Chorus)
