"One Small Step"

Visit "[One Small Step](#)" on MotoLyrics.com

All in all this world is what it is
We shall leave the way we came
Changed in years, lives and memories
All the pictures that make up our day
One small step
Is all we'll ever take
In this slipstream of mankind
All the things we'd have liked to do
Had we been much older then
Standing alone at the end
With the sun full in my eyes
Thinking of what we might see
Had we lived a lifetime from now
All in all this world is what it is
We shall leave the way we came
Changed in years, lives and memories
All the pictures that make up our day
Standing alone at the end
With the sun full in my eyes
Thinking of what we might see
Had we lived a lifetime from now
All in all this world is what it is
We shall leave the way we came
Changed in years, lives and memories
All the pictures that make up our day
One small step
Is all we'll ever take
In this slipstream of mankind
All the things we'd have liked to do
Had we been much older then
