Time stands still  
In this cold and dark place  
An endless journey  
Only to face death

The path behind me  
Suddenly gone  
Cold voices  
Darkness draws near

Trapped in solitude  
Forced to suffer  
Frozen by the mist

Dark  
Skies of unholy demons  
Killing the angels of light  
Evil night

Plague  
Sweeping over the cursed  
Land of doom  
An endless wandering of circles

Wandering through a cold mist
