I am war, your truest god  
My presence you'll regard as nothing new  
I am war, your sacred muse  
But this time no one wins you all will lose

I am plague, your darkest fear  
I haunted you since early dawn of time  
I am plague, your hated god  
In rotting flesh of humans, you'll see me

I am starvation, your doom  
Some of you have never met me yet  
I am starvation divine  
The new god to be known among your men

You have forgotten me  
It's time to reunite

War, plague, starvation, death  
War, plague, starvation, death  
War, plague, starvation, death  
War, plague, starvation and death

Mortal troops march toward us  
They will struggle in vain  
War inventions, toys of war  
We're above your tiny games

I am death, your final breath  
I'm the one that strikes you from behind  
I am death, your most feared god  
Invisible 'til you're already mine

You can't escape from me  
In darkness we unite

War, plague, starvation, death  
War, plague, starvation, death  
War, plague, starvation, death  
War, plague, starvation and death
