Kendall:

When the chips are down
Back against the wall
Got no more to give
Cause we gave it all
Seems like going a distance is unrealistic
But we're too far from the start

Carlos:

So we take what comes, And we keep on going
Leaning on each others shoulders
Then we turn around
And see we've come so far somehow

James:

We're halfway there
We're looking good now
Nothing's gonna get in the way
We're halfway there
And looking back now
Never thought that I'd ever say
We're halfway there
We're halfway there

If you never flew
We would never fall
If The world was us
We would have it all
But the life we live
Isn't so simplistic
You just don't get what you want

Logan:

So we take what comes
And we keep on going
Leaning on each others shoulder
Then we turn around
And see we've come so far somehow

James:

We're halfway there
We're looking good now

Nothing is going get in the way
We're halfway there
And looking back now
Never thought that I'd ever say
We're Halfway There
We're Halfway There

Logan:

How are you Ever Gonna Reach the Stars
If you Never Get off the Ground
And You'll Always be Way you are
If you Never Let Life Knock you Down

All:

We're halfway there
We're looking good now
Nothing is going get in the way
We're halfway there
And looking back now
Never thought that I'd ever say
We're Halfway There
We're Halfway There
We're Halfway There
We're Halfway There
