Now that we have gotten through one more fall  
I can just admit I've got it all  
Cos I do, cos I've got you  
We've crossed these battle lines too many times  
It passes through the heart but it never leaves a mark

Cos your love just keeps on healing me  
No matter how I bruise  
If I just trust in your love, just keeps on healing me  
One more clue, one more chance that wasn't there  
before  
In your arms no pain can harm the way I'm feeling  
Lord I know that your love is healing

I've kicked around these lines in my head  
But I never listened to the words that you said  
See where it's lead  
Well I know I have it now cos you showed me how  
And all I had to do was just to keep my eyes on you

Cos your love just keeps on healing me  
No matter how I bruise  
If I just trust you, your love just keeps on healing me  
One more clue, one more chance that wasn't there  
before  
In your arms no pain can harm the way I'm feeling  
Lord I know that your love is healing

Cos your love just keeps on healing me, yeah  
No matter how I bruise  
If I just trust you, your love just keeps on healing me  
One more clue, one more chance that wasn't there  
before  
In your arms no pain can harm the way I'm feeling  
Lord I know that your love is healing  
It's healing
