

Denison Marris**"Every Star"**

Visit "[Every Star](#)" on MotoLyrics.com

All the planets

And their moons

Recognize your beauty

And bow to you

Every star

And all their light

Shine your love

Down on me tonight

To the distant galaxies

And far beyond

I pledge my love

To the one inside my heart

I'm struck speechless

Failing to move

There's no measure

Of my love for you

We will never die

This can only last forever

And you my dear

Are interstellar
