"Involuntary Suicide Signal"

Visit "[Involuntary Suicide Signal](#)" on MotoLyrics.com

I was just sitting here with the earth
Sliding beneath me
Watching the mountains grow
That's when you said that you need me
What good am I but a wasted amount that was
energized
I'll never really try
I'll just evolve into suicide

Don't call me
Don't seek me out
I don't care to know
What love with you is about

Perhaps you couldn't hear
Maybe you didn't receive the signal
Telling of how I don't of what we could be
You should evacuate
I refuse to investigate our potential
Now all show me to rest in peace

Don't ask me
You can't beg enough
I will never return you love
Every time I crawl away to die
You always end up right there by my side
So let me hear just one more time
Of your plans to save my life
How you'll love me until the end of time

Please call me
Won't you seek me out
I'm dying to know
What love with you is about

Please ask me again
Then show me how
Isn't this funny
I'm the one begging now
