Your glorious silhouette

Will never empty

I love the way the silver moon

Makes it shimmer for me

And I wonder if

If you could be the one

I'll pick up the pen

And write like mad

And free the song

I'll write about how

I've finally found you

As it turns out

You've loved me all along

And I wonder if I

Could be the one for you

But you just smile

And tell me that

My new life has begun
