

## Denison Marris "Ultraviolet"

Visit "[Ultraviolet](#)" on [MotoLyrics.com](https://MotoLyrics.com)

We'll find our future  
Where ultraviolet rays collide  
Incredible particles of light  
Make it easy to identify  
Let's put some space  
Between us and the rest of the civilized world  
They'll gladly bid their farewells  
To you and me

We'll make for the sky  
Just as soon as the moon  
Turns out the lights  
No time will apply  
When we become one  
And we glide  
Traveling at the speed of sight

So lets' make our lunar mission  
And tell no one of our new found dimension  
Then just as we reach the night side  
We'll tear off into our new life
