6 floors up and 2 dors down again
She misses her family in Japan
The window stand in silence in the all
The side of the Drake Tower say it all
Place all that wait on me
And i won't let you down
I won't lets you down
I see it gets hard to stay around
You and i are like this fallen leaves
Let go by the streets named after trees
We circle people we do and don't know
It's so hard to never feel alone
Place all that wait on me
And i won't let you down
I won't lets you down
I see it gets hard to stay around
Place all that wait on me
And i won't let you down
I see it get hard to stay around
