I heard my phone ring out, came out the door  
It's in a corner so I pressed it more  
But then it happened fast and it was when it passed  
This message in my phone

It's not depressing although she been calling my cell  
I'm pressing 7 to 1 and listen to what she's saying  
I hear her crying on the other line, she's asking  
'Girl why, why would you do it to me?'

So baby can you tell me how was she calling?  
Oh, baby can you tell me, yeah  
She telling me the ring on her finger up and  
disappeared  
And I quit being around with you

So baby can you tell me what was she saying?  
She's telling me that you have gone and got one on the  
way  
Baby it's no use, is it that so small?  
The day that I got, got that wake up call  
That wake up call

So much for spending every second in my life with you  
I played it for you with another girl  
If I could take it back, all the nights we had  
I'd throw them in your face and I'd never look back  
again

Wasn't the first time she had ever called your phone  
You said she's just a friend, never saw it coming then  
And now I'm screaming on the speaker phone  
Wondering how, how could you keep it from me

So baby can you tell me how was she calling?  
Oh, baby can you tell me, yeah  
She telling me the ring on her finger up and  
disappeared  
And I quit being around with you

So baby can you tell me what was she saying?

She's telling me that you have gone and got one on the way  
Baby it's no use, is it that so small?  
The day that I got, got that wake up call  
That wake up call

Lucky that she had ' me and tell me what's going on  
As free as the sky and baby I, gotta be moving on  
' out that door I wasn't expecting a call  
But then it happened fast, it made it last, the way to  
make me laugh

So baby can you tell me how was she calling?  
Oh, baby can you tell me, yeah  
She telling me the ring on her finger up and  
disappeared  
And I quit being around with you

So baby can you tell me what was she saying?  
She's telling me that you have gone and got one on the way  
Baby it's no use, is it that so small?  
The day that I got, got that wake up call  
That wake up call

So baby can you tell me how was she calling?  
Oh, baby can you tell me, yeah  
She telling me the ring on her finger up and  
disappeared  
And I quit being around with you

So baby can you tell me what was she saying?  
She's telling me that you have gone and got one on the way  
Baby it's no use, is it that so small?  
The day that I got, got that wake up call  
That wake up call
