Gravity keeps pulling me down
(Repeat 7X)

I want to go to Houston, I want to fly to the stars
But I may not have the "Right Stuff" to make the trip
To Mars
'Cause it's so hard for me to get my weight off the
Ground
Yes, it's that Gravity ? It keeps pulling me down

I want to climb Mount Everest, and find my Shangri-La
Learn the secrets of the Universe from the Wise Man in
Nepal
But it's so hard for me ? That mountain's so steep
I know my nose will bleed, 'cause Gravity don't sleep
It don't sleep...

I'm floating... I'm floating... above the crowd
No tensions... no pressures... I touch the clouds

I'm flying... I'm flying... in ecstasy
My problems can't find me... Zero Gravity

Gravity keeps pulling me down
That Gravity keeps pulling me down

I want to be a driver at the Monaco Grand Prix
Have the fastest car in Europe, and meet the Royal
Family
But it's so dangerous ? It's not the speed that I fear
It's just so difficult to get my motor in gear

I want to be a Millionaire, and own a baseball team
Have a private jet for shopping trips, and a
Chauffeured limousine
And pay no income tax, and be healthy and sound
But it's my Gravity ? It keeps holding me down
