"What About The Half"

Visit "[What About The Half](#)" on MotoLyrics.com

What about the half that's never been told?
What about the half that's never been told?
Look how long it's been kept a big secret
Look how long it's been hidid away

The half, the half, the half that's never been told
What is hidden from the wise and good
It shall reveal to babe and suckling
The half, the half, the half that's never been told

Whoah, the half, whoah

Whoah, what about the half that's never been told?
What about the half that's never been told?
Look how long it's been kept a big secret
Look how long it's been hidid away

The half, the half, the half that's never been told
What is hidden from the wise and good
It shall reveal to babe and suckling
The half, the half, the half that's never been told

Whoah, the half that's never been told

What about the half that's never been told?
What about the half that's never been told?
Whoah, what about the half...
