We're starting it over, we're making way for destiny

A time to turnover a better life for you and me

A new recreation to channel all this energy

Let's solve the equation, I need to feel, you close to
me

So baby let your conscience go

There's no turning back when love takes hold

Hold me baby, drive me crazy

Touch me all night long

Make me love you, kiss and hug you

Touch me all night long

The more that I see you

The more I know that love belongs

With you in my mind boy

I wouldn't know what's right from wrong

Cos love will takeover

And leave you out of sight and mind

You've got to go with the feeling

And trust fate to be kind

And baby let your conscience go
There's no turning back when love takes hold
Hold me baby, drive me crazy
Touch me all night long
Make me love you, kiss and hug you
Touch me all night long
Hold me baby, drive me crazy
Touch me all night long
Make me love you, kiss and hug you
Touch me all night long
And baby let your conscience go
There's no turning back once love gets hold
Hold me baby, drive me crazy
Touch me all night long
Make me love you, kiss and hug you
Touch me all night long
