Baby let's get out of this place  
Cause every one we knew has gone  
Down into the cold sand we could shove  
I've been getting nothing but tired  
Down through the years  
Let's leave all the troubles in the world  
To the things that swim above

Sing for me like you used to  
Just one more time  
And I will wish the sunshine and the wind goodbye  
Stretch me out across the sand  
Let me stare into a blue sky  
Just to catch a glimpse of a real cloud  
Not the kind hanging round my eye

And let our shells be thick  
To keep out the worry and the news  
Bury yourself quick  
And you may never hear the blues
