"Midnight"

Visit "[Midnight](#)" on MotoLyrics.com

When the sun comes up in the mornin' till the shadows
start to fade

I think about a midnight long ago

I remember midnight kisses & the magic of a smile

& the midnight moon above like it used a crown

(Ooo Midnight, ooo Midnight)

My days are lonely without you

It was 12 o'clock when I met her, & her hair was raven
black

So I used to call her Midnight just for fun

We were laughing through the darkness, making
wishes on a star

& every wish came true except for one

(Ooo Midnight, ooo Midnight)

My days are lonely without you

(Instrumental)

(Ooo Midnight, ooo Midnight)

My days are lonely without you

& now I'm always midnight blue
