This mourning sites
Joyrides
Little housing in the countryside
Understand, meritorius
Compromise the Satan's line
Get the Balance right, get the balance right

Irresponsible, expectable
Stable on what's going on
Self to carry
Help the helpless
But always remain
Mostly a little selfish
Get the balance right, get the balance right

You got to be good enough
You got to have a golden heart
Wish you wish your tongue
Get awoken to talk
But prepare to suffer the fall
It's almost distinctive

Don't take this way
Don't take that way
Straight down the middle until next Thursday
Across to the left
Back to the right
Twist and turn 'til you get it right
Get the balance right
Get the balance right
Get the balance right
Get the balance right Get the balance right
