Now hear this my friends  
I'll never be the same again  
Gonna lock myself in a cold black room  
Put a shadow o'er myself  
And a veil of gloom  
I will function, operate  
I will be  
A satellite of hate

Driving to this point by a chain of events  
Each one pushed me nearer the edge  
Gonna send my message through to you  
And you'll receive the signal too  
I will function, operate  
I will be  
A satellite of hate  
Higher

Disillusioned  
I was disenchanted  
Forgot the love that had been implanted  
Heard the lies and I felt the cold  
It broke my heart  
And I lost control  
Now I'm a satellite of instinct  
I'm a satellite of hate  
A satellite of hate Higher
