"Beyond The Gate"

Visit "[Beyond The Gate](#)" on MotoLyrics.com

While the night is coming
In this silent world
Darkness is my only friend, my reward for all
Searching for the future
Past is left behind
And I have some doubts into my mind

Time, I've spent (so) much time
To fly away without my mind
And now I know this is my only world?Â

I'll try to get a place into the sky
Beyond the gate I see the light
I want to make my way tonight

Through this holy darkness
Moon will ride with me
I am lost in emptiness, and I've lost my dreams
Death is all around me
Fire burns inside
While the gate is shining in the night

Time, I need more time
To find my way beyond this life
Where is the key for entering this world?

I'll try to get a place into the sky
Beyond the gate I see the light
I want to make my way tonight
Beyond the gate
I'll try to reach out (for) the other side
Where is the gate of space and time?
I want to fly away tonight
Beyond the gate
