"Shine"

Visit "[Shine](#)" on MotoLyrics.com

I remember the mountains
Reflecting in the great salt lake
That crazy summer
We hitchiked down west
Sundown in the desert
Firelight on your face
That's the night I'll never forget
By the light of the silver moon I was playing my guitar
while you danced in circlces under the stars
And I thought
Somewhere in heaven they must miss you
Somehow you found your way to me
This world looks brighter then it used to
And I want to spend the rest of my life watching you
shineeee
Shineeeee
You take the ordinary and make it beautiful
You can light up a room with the smile on your face
Everyone who knows you feels the miracle
You make the world a better place
Last night it really hit me laying by your side
All the little ways your teaching me to fly and I thought
somewhere in heaven they must miss you
Somehow you found your way to me
This world looks brighter than it used to and I want to
spend the rest of my life watching you shinnee shineee
Your my inspriation, destination for all time
When darkness blinds me your love finds me like a
guiding star for my heart you shineeeeeeee
And I know somewhere in heaven they must miss you
Somehow you found your way to me
This world looks brighter than it used to and I want to
spend the rest of my life watching you shineeeeeeee
shineeeeeeee shineeeeeeee
