The look in your eyes  
When you left here that night  
Was like somebody'd stolen your soul  
The trance you were in  
Made me crawl in my skin  
You were under some outer control  
But I won't give up hopin'  
The spell can be broken

## CHORUS

When you come around  
To your own good sence  
When you break the chains and you're free again  
I'll be waiting here to take you in  
When you come around  
If it takes a day or a hundred years  
Me and my heart are gonna be right here  
To pick love up where we put it down  
When you come around

The moon can't see out from behind the winter clouds  
Don't know how you could find your way home  
So I'll stay up all night  
Like I do every night  
To make sure that the porch light stays on  
The winds may be blowin'  
But these arms will be open

## CHORUS

If it takes a day or a hundred years  
Me and my heart are gonna be right here  
To pick love up where we put it down  
When you come around

When you come around  
When you come around
