1

an image from a long long time ago
is haunting me, it plays itself with
picture perfect clarity

a certain walk a certain talk

-forever twenty-three-

for only me to see

chorus:

I watch it like a movie

the details so consume me

what's real will surface when it's gone

(and then it's gone)

2

by now you've heard the news

what is there left to do

chorus:

I watch it like a movie

the details so consume me

what's real will surface when it's gone

(and then it's gone)

3

your face looks so familiar

unwashed and quite peculiar

no I can't say that I recall

I guess it's gone
