In a society supposedly evolved  
We still can see primitive thinking

People who live using preconceived ideas  
About life and death

How can we be sure of what we believe  
In such a complex world

It is time to stop ignoring  
That no one in this world can hold the ultimate truth

Open your mind  
Open your eyes  
And find something that is undeniable

Many are the ones who create  
Fake beliefs for their advantage  
Exploiting all those  
Who really need to believe in something

Humanity's Carelessness
