

Descend Into Nothingness "The End Of Time"

Visit "[The End Of Time](#)" on [MotoLyrics.com](#)

I'm walking my way back home
Following the infinite loop of the human being
I see a suspicious light in the sky
Darkening my entire soul

All around me, people scream and point to the sky
Transforming the peaceful atmosphere into a total
euphoria
I'm fighting with my mind to keep control over myself
But I start running without any destination

Evidence of the end
Now is possessing me
Decadence of the Earth
Losing it's place in the universe

I'm feeling the end of time
I'm living the end of time

The darkness is now invading the surroundings
The clouds are splitting, letting the Earth unprotected
And I hear a diabolic noise... louder... and louder

The strenght of the impact destroyed all lifeforms
The Earth is now a gigantic pile of dust
Floating into infinity, releasing it's heritage

Lost forever

This is one of the infinite possibilities
About what could be the end of all ends
No onw knows how it will happen
But everyone knows that it could be our destiny
