Beautiful liar heartless survivor where are you taking  
me now  
Smooth operator do it all later when will you ever come  
down  
I still believe in you now somehow I still believe in you  
now

We've been together a year and forever you should  
know me by now  
There's trouble in my mind I can't find the right lines to  
get to you somehow  
I still believe in you now somehow I still believe in you  
now  
And that feeling that I get inside everytime I see the  
sun in your eyes  
Then the moon starts to crying our hearts not denying  
A feeling we can hold through the night

Beautiful dreamer make me life sweeter dream a song  
in my heart  
I'm running on empty I know you've been tempted  
To close the door from the start  
I still believe in you now somehow I still believe in you  
now  
[ guitar - steel ]  
And that feeling that I get inside...  
Beautiful liar heartless survivor...  
I still believe in you now somehow I still believe in you  
now
