I don't wanna see no lips of all the lips you've ever  
kissed  
I just wanna be your number one  
I don't need no one to warm me, I don't care who came  
before me  
I just wanna be your number one

All that happened yesterday is now a part of history  
Let me be your destiny, let's do what's right for you  
and me  
I don't wanna try and undo all the wrong somebody  
done you  
I just wanna be your number one

My whole world revolves around you, life began the  
day I found you  
I just wanna be your number one  
Let's not spend no time discussin' anything that don't  
mean nothin'  
I just wanna be your number one

Take me in your arms, turn out the light lock the door  
And I won't even wonder if somebody had a key before  
I don't wanna solve no mystery, yesterday belongs to  
history  
I just wanna be your number one, number one

I just wanna be your number one  
I just wanna be your number one  
I just wanna be your number one
