Me the girl untouchable who always kept her distance
Me the boy untouchable the wall of solid resistance
A walk a talk and one little kiss who would have thought
it would lead to this
Love has touched the untouchables right in the heart
What am I gonna tell him what am I gonna say
How will I explain to her falling for you this way
Married and both untouchables
And that's what makes things worse
For love has touched the untouchables right in the
heart
Right where it hurts
[ steel ]
What am I gonna tell him...
