"Volcano"

Visit "[Volcano](#)" on MotoLyrics.com

We climb molten rock
Sweating, bleeding
We can't stop
Dream demons whisper spells
To punish the dwellers in earthly Hell

Starved, still we reach the top
Close our eyes, look towards the Gods
Summon fire from the Earth
Incite the flames, we fear not death

Magma
Heats
We fear not death

Duncan
Hills
We fear not death

Duncan
Rock
We fear not death

Volcanic
Hills
We fear not death

Mantle crust ignites
Bleeding, heated birth
Will we die tonight?
Punished by the Earth

Highland fires burn for shelter
Incantations help no better
Frozen human
Run, they're freeing
Live forever
Horrid sculpture
Forever screaming

Mantle crust ignites

Bleeding, heated birth
Will we die tonight?
Punished by the Earth

Come and take us
We mock your anger
We laugh at your power
We fear not death
We fear not death

We challenge your fury
We'll dive into lava
We'll burn like we're cinders
We fear not death
We fear not death
We fear not death
Dive!
We fear not death (repeatedly)
