"Shattered Illusions"

Visit "[Shattered Illusions](#)" on MotoLyrics.com

The giant fears that creep upon you as you gaze with
open eyes
at the world that surrounds you, hollow shells of faded
dreams
Somewhere close I feel your breath and somewhere I
sense death
What I felt for you last night is dying with the morning
light
Shattered illusions makes me confused
Shattered illusions
...???...over your head...???...
You're standing, watching the years...???...
...???...
...???...you don't wanna turn...???...
Shattered illusions makes me confused
Shattered illusions
Shattered illusions
Start making every scene searching every bar
You're working on another scheme, illusion takes you
but how far
Somewhere close I feel your breath and somewhere I
sense death
What I felt for you last night is dying with the morning
light
Shattered illusions makes me confused
Shattered illusions
Shattered illusions makes me confused
Shattered illusions
It's not supposed to be this way!
